Q.6 What is the full form of e-mail?

- a) Elegant mail
b) Elementary mail
c) Elaborated mail
d) Electronic mail.

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Read the following passage:

Football is a popular sport in India. Football has enjoyed popularity in Kerala, West Bengal, Goa and north-eastern India which consists of Assam, Manipur, Meghalaya, Mizoram, Nagaland, Tripura, Arunachal Pradesh and Sikkim. India's current top domestic league I-league, was formed in 2007 in an attempt to professionalize domestic football. In 2013 the Indian super league was formed as an unrecognised professional league with 8 teams to promote Indian football to the country and world. After three seasons, the Indian super league was recognised as a top tier league, running in a parallel with the I-league, thus leaving India as one of the few countries with two fully recognised top tier leagues. Also contested is Santosh Trophy, a knock-out competition between states (Provinces) and government institutions. The current captain of the Indian national team is Sunil chhetri. India is

(2)

180011

currently ranked 103 among the FIFA world Rankings.

Now answer the following questions:

- Q.7 Which is a popular sport in India?

Note: Objective type questions. All questions are compulsory.
(6x1=6)

Q. Read the following passage carefully and answer the questions
that follow: (CO-3)

Pollution is a reduction in the quality of the environment by the introduction of impurities. Smoke pollutes the air, *sewage* pollutes air, *sewage* pollutes the water and solid wastes (garbage, junk etc.) pollutes the land. Population explosion, urbanization and industrialization are its biggest causes. Heavy quantities of sewage of big cities which is dumped into rivers causes water pollution. Even bigger enemy than this are the industrial units which drop their waste water polluted with harmful chemicals into the rivers. The result is that water becomes unfit not only for human being but also for many plants and animals that depend on it. Take the case of Delhi; the 25 km long stretch of the Yamuna near Delhi is polluted because of the city sewage and the industrial waste that fall into it. The polluted water causes many fatal diseases like cholera, jaundice etc. The smoke coming out of the chimneys of factories and emitted by innumerable motor vehicles makes the air unbearably. Trees can check air pollution to some extent but they are also being cut recklessly. When we regularly breathe in the air which is laden with smoke, dust particles and harmful germs we fall a prey to headache, nausea and many diseases of the lung and the heart. But this problem is not peculiar to India alone; this is a global problem. It is heartening that world leaders are seriously attending to this problem.

Q.7 What is Environmental Pollution?

Q.8 How the industrialisation has affected the environment?

Q.9 What is Water Pollution?

(2)
